

Trex I-Frame Available for Channel Partners

The Trex® I-Frame is a turnkey, customized version of Trex.com that you can embed within your own company website. You can utilize this digital marketing tool to showcase the portfolio of Trex outdoor living products without requiring anyone to leave your site.

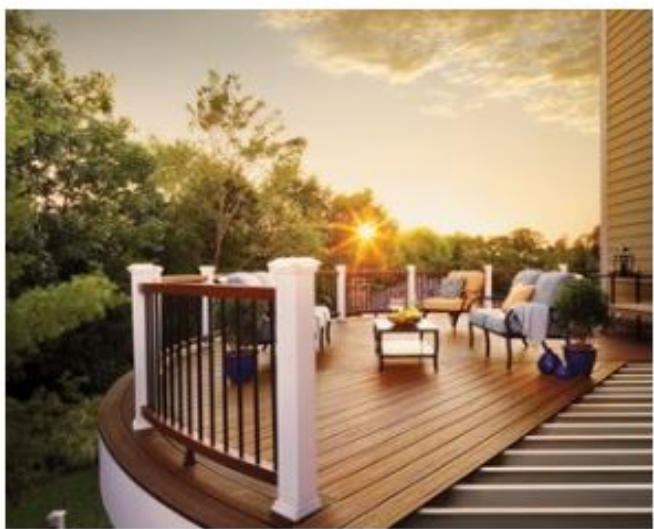

Using the I-Frame will also ensure that your customers will always see the latest Trex information available for key product categories:

- Deck Framing
- Composite Decking
- Railing
- Outdoor Lighting

The I-Frame has been updated to now include product information and color swatches on the Enhance Naturals and Enhance Basics decking lines. Any future changes to the partner site will automatically be reflected within the I-Frame on your page, eliminating the need for additional action on your end.

THE TREX® PRODUCT FAMILY

DECK FRAMING

COMPOSITE DECKING

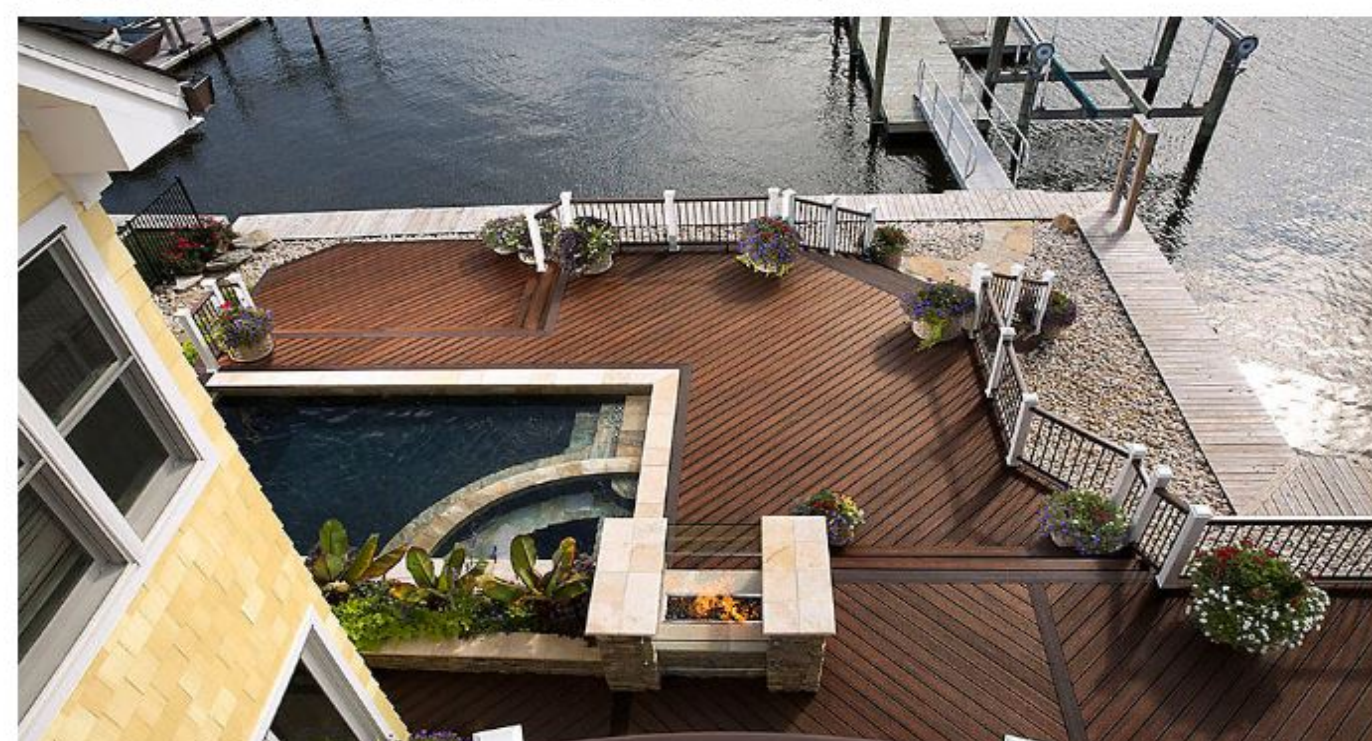

RAILING

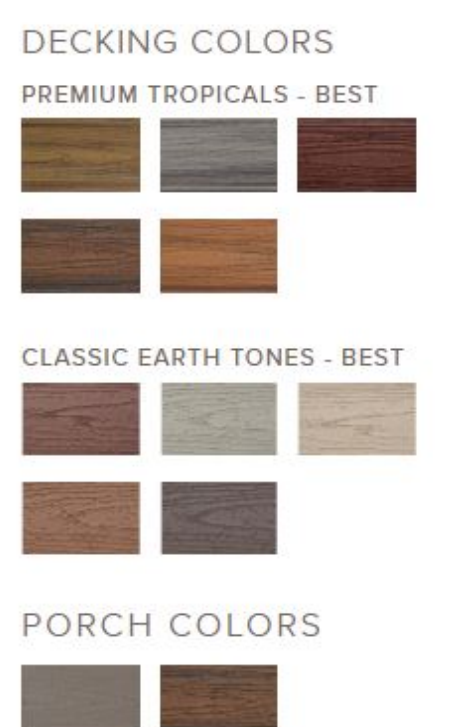

OUTDOOR LIGHTING

TRANSCEND® COMPOSITE DECKING

TREX TRANSCEND® DECKING IN SPICED RUM AND TRANSCEND® RAILING IN CLASSIC WHITE AND VINTAGE LANTERN
This deck in Spiced Rum showcases the unrivaled durability and wood-grain beauty of Trex Transcend® decking.
